IMSA COMPETITION MEMO # ALMS 08-04

To: All American Le Mans Series Entrants

From: Tim Mayer, Chief Operating Officer
Scot E Elkins, VP Technical Operations
H. Doug Robinson, Executive Director

Date: 1 October 2008

Re: Approval for the use of additional Detergent in Series specified fuel

In response to a request for a variance from competitors, IMSA has agreed to permit the use of additional detergent (known under the brand name Techron) for the series specified IMSA E10 fuel, for the remainder of the 2008 season. This detergent is currently a component of the fuel. This agent will be controlled and introduced to the fuel supply under the direction of IMSA, at the entrant's written request.
